SUMMARY

Frontend and Full Stack Developer with 3+ years of experience building scalable web applications across PropTech, manufacturing, and travel domains. Proficient in React, TypeScript, Next.js, Node.js, and Supabase. Proven ability to deliver production-ready features in Agile environments, integrate third-party APIs, and ship user-centric products end-to-end.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, CSS3, HTML5

Frameworks & Libraries: React.js, Next.js, Node.js, Drizzle ORM, TanStack Query, React Hook Form, Zod, Framer Motion, Shadcn UI, Radix UI, Tailwind CSS

Databases & Backend: MongoDB, PostgreSQL, Supabase, Prisma ORM, NextAuth, Redis

Tools & Platforms: Git, NPM, AWS S3, Vercel Blob, Vite, Mapbox GL, Recharts, Storyblok CMS, Sentry, PostHog, jsPDF, ExcelJS, Resend, Docker (basic)

Methodologies: Agile / Scrum, REST APIs, Role-Based Access Control (RBAC), CI/CD

WORK EXPERIENCE

Full Stack Developer

ColivIQ — Property Management SaaS Platform | Germany (Remote) | Jan 2026 – Present (5 months)

- Built and maintained features for a PropTech SaaS platform using **React, TypeScript, Vite, Supabase, Tailwind CSS**, and **Shadcn UI / Radix UI**.
- Developed interactive property listing pages with live filters and **Mapbox GL** map view, improving property discovery experience.
- Implemented **role-based access control (RBAC)** and authentication flows for Super Admin, property owner, and tenant roles.
- Built super admin tenant management dashboard and a multi-step property onboarding wizard with dynamic revenue configuration.
- Integrated **Recharts** for analytics dashboards and **Storyblok CMS** for multilingual content management (i18n).
- Developed reminders and notification systems, booking workflows, and **PDF report generation** using jsPDF.
- Monitored application health via **Sentry** and **PostHog**; contributed across 470+ pull requests.

Full Stack Developer

Shivatex Texyarn Limited, Coimbatore | May 2024 – Dec 2025 (20 months)

- Led end-to-end development of 4 production applications for internal operations and client delivery, covering asset management, order workflows, corporate presence, and product visualization.
- Applied Agile methodologies, fixed front-end bugs, and optimized cross-browser responsiveness; collaborated with designers, backend engineers, and QA.

Key Projects Delivered:

- **Asset Management System (Next.js, Prisma, NextAuth, Zod, ExcelJS, PostgreSQL):** Full-stack internal platform for tracking company assets with image support, activity logs, lost-asset reporting, Excel export, and admin panel.
- **Order Management System (Next.js, Prisma, TanStack Query, Recharts, Resend, Redis, Vercel Blob):** Multi-tenant order tracking platform with multi-division access control, SLA management, audit trail, email notifications, analytics dashboards, XLSX export, and print-ready order views.
- **Ellendorf Wallpaper Visualizer (Next.js, Tailwind CSS, Framer Motion, Radix UI, jsPDF):** Interactive wallpaper product dashboard for client Ellendorf; features wallpaper browsing, recent installations gallery, services directory, and PDF export with auth-gated access.
- **Shivatex Corporate Website (Next.js, Spline 3D, Framer Motion):** Company website with 3D interactive hero animations; sections for About, Brands, Divisions, Careers, Board of Directors, and Shareholders.

Frontend Developer — Freelancer

Wij Zijn Reizigers Private Limited, Maharashtra | Feb 2023 – Apr 2024 (15 months)

- Engineered a **Visa Application Interface** using **Next.js, Drizzle ORM, PostgreSQL**, and **AWS S3**, enabling travelers to upload documents and track real-time application status.
- Integrated conversational AI workflows to allow users to update information, submit documents, and resolve pending requirements directly via chat.
- Designed and developed the **Visa Genie** chat interface (UI/UX), improving clarity of required, provided, and pending items.
- Identified Railway hosting latency issues and migrated to Render (India-based), significantly improving performance and reliability.
- Leveraged AI tools and Agile practices to implement automation workflows (visa type selection, document validation) and lay the foundation for an AI-powered travel agent platform.

EDUCATION

Bachelor of Engineering — Electrical and Electronics | Anna University, Chennai | Nov 2017
